CARE AND MAINTENANCE

Gooseneck Basin Tap - Clinic Lever

Bridgepoint SKU: ID02050-DC Idral code: 02050/DC

Routine cleaning

• Clean chrome surfaces with water and soap, then dry with a soft/damp cloth.

• Do not use aggressive, acidic or abrasive cleaning liquids.

Preventive care

• Water quality strongly affects long-term reliability. Use filtered water and address excessive mineral content where necessary.

• Keep accessible flexible hoses and connections under periodic inspection for leaks, damage or deterioration.

• Mechanical components normally require no routine servicing when water quality and installation are correct; use genuine Idral spare parts when replacement is required.

Follow local plumbing regulations and use qualified personnel for installation and servicing.
