

CARE AND MAINTENANCE

Round Countertop Basin 40cm Matt Grey
Product code: AC201005MCG

Routine cleaning

- 1 Rinse loose dirt from the basin with clean water.
- 2 Wipe with a soft cloth or non-abrasive sponge using warm water and a small amount of mild pH-neutral cleaner.
- 3 Rinse thoroughly so no cleaner remains on the ceramic, waste or overflow components.
- 4 Dry with a clean soft cloth to reduce water marks and limescale deposits.

Avoid

- 1 Abrasive powders, scouring pads, wire wool and gritty cleaners.
- 2 Strong acids or alkalis, drain cleaner, undiluted bleach, solvents and paint removers.
- 3 Leaving hair dye, cosmetics, toothpaste, soap or cleaning chemicals on the surface for prolonged periods.
- 4 Heavy impact, dropped objects, boiling water and sudden extreme temperature changes.

Special-finish care

The matt grey finish requires gentle cleaning. Test any unfamiliar cleaner on an inconspicuous area first, do not polish the surface, and remove limescale gradually with a manufacturer-approved product suitable for coloured ceramic.

Ongoing checks

Inspect silicone joints, wall fixings, the waste and the trap periodically. Repair failed sealant and leaking connections promptly. Do not use the basin as a seat, step or support surface.

Damage caused by unsuitable cleaners, impact or incorrect installation is not a manufacturing defect. Retain the technical specification and proof of purchase for future reference.
